**Re: WC Docket No. 10-90
Rural Broadband Experiment Expression of Interest for Price Cap Areas
Green Hills Area Cellular Telephone Inc. dba: Green Hills Telecommunications
Services**

Dear Ms. Dortch:

Green Hills Telecommunications Services hereby expresses interest in participating in the Commission's rural broadband experiments to provide robust, scalable high-speed broadband to unserved high-cost areas with additional Connect America funding.¹ Green Hills Telecommunications Services is a CLEC serving rural areas of Missouri, and proposes deployment as follows.

Proposed Service Area

Caldwell, Missouri, Census Tracts 29025950100 and 29025950200

The experiment will provide broadband service to 1,399 eligible high-cost locations in unserved or underserved high-cost Census Blocks with these Census Tracts.

Daviess, Missouri, Census Tracts 29061470100 and 29061470200

The experiment will provide broadband service to 971 eligible high-cost locations in unserved or underserved high-cost Census Blocks with these Census Tracts.

Dekalb, Missouri, Census Tracts 29063080100

The experiment will provide broadband service to 1,279 eligible high-cost locations in unserved or underserved high-cost Census Blocks with these Census Tracts.

¹ See *Technology Transitions et al.*, GN Docket No. 13-5 et al., Order, Report and Order and Further Notice of Proposed Rulemaking, Report and Order, Order and Further Notice of Proposed Rulemaking, Proposal for Ongoing Data Initiative, FCC 14-5 (rel. Jan. 31, 2014).

Livingston, Missouri, Census Tracts 29117480100 and 29117480200

The experiment will provide broadband service to 929 eligible high-cost locations in unserved or underserved high-cost Census Blocks with these Census Tracts.

Ray, Missouri, Census Tracts 29177080000, 29177080100, and 29177080300

The experiment will provide broadband service to 2,950 eligible high-cost locations in unserved or underserved high-cost Census Blocks with these Census Tracts

Proposed Services

Voice and Broadband services with broadband transmission speeds of at least 3 Mbps downstream/768 kbps upstream provided over Fiber to the Premise Technology.

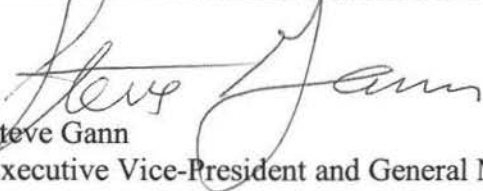

Funding

Because the unserved high-cost census blocks within the selected Census Tract(s) have yet to be identified, Green Hills Telecommunications Services is unable to estimate the construction costs and amount of funding needed. The costs will be identified if and when a formal proposal is submitted.

Green Hills Telecommunications Services expects service within the unserved high-cost Census Blocks to be offered within 1-3 year after construction starts in any given census block. Without knowing the route miles involved it would be difficult to be more specific.

Green Hills Telecommunications Services appreciates the opportunity to provide this non-binding expression of interest. Please contact the undersigned with any questions.
